CGS"TEXTILE MIS

"A sound integrated package that transforms the entire way you do the business".

Textiles are products of mass consumption that are sold in giant quantities and therefore symbolize a significant essence in the global economy. At the same time it is a highly competitive division dominated by the need to produce well and economically. Hence the use of superior management and production control is increasingly essential for textile industries.

CGS Textile MIS is flawlessly integrated with CGS'Financials, Asset Management System and payroll MIS to chip in all the business routes & activities for managing textile mills' different processes i.e. spinning, processing and weaving, in a multi user and multi location environment. This end to end integration begins from establishing production plan, raw-material procurements to ultimate sales. This MIS completes all cycles i.e. Requisition, Procurement e.g. purchasing quality raw material (Contamination free), order and consumption. It endows with supreme management controls to the textile millers in terms of cost, production, and quality and customer relationships management as well.

For Textile Industry CGS is offering following advanced technological solutions:

ADVANCED TECHNOLOGICAL SOLUTIONS
